

Prompt

You are a DMN modeling expert.

Based on the following business scenario, generate a complete Decision Model and Notation (DMN) artifact.

Your output must include:

1. A Decision Requirements Diagram (DRD) structure (decisions and dependencies).
2. Decision tables for each decision that you include in the DRD.
3. A complete, executable DMN XML file compliant with the OMG DMN standard.
4. Proper hit policies.
5. Correct input/output type definitions.

Do not provide explanations. Output only the DMN content.
